

Create a Daily Reminder Message
WordPerfect Magazine
Q&A

Q: We need a daily reminder that can be called up when we start WordPerfect in the morning. How can I do this? --Karen M. Heuer, Claremont, CA

A: The included REMINDER.WPM macro can be used to display a predefined reminder in WordPerfect.

To customize the macro, press (Ctrl-F10), type "reminder" and press E. The macro editor will display the figure below. Change the highlighted text to your own reminder text, then press F7 to save and exit the macro.
