

Time and Time Again  
WordPerfect Magazine  
Tips

One of my favorite WP 5.1 macros is the TIME.WPM macro, which briefly displays the date and time on the document screen. When I upgraded, I wanted to create a similar macro for WP 6.x.

The new, included 6.x TEMPTIME.WPM macro displays the date and time on the screen (see figure below) and disappears at the touch of a key.

To play the macro, press Play Macro (Alt+F10), type "temptime" and press (Enter). Press any key to dismiss the dialog box.
