

Directory Sorting Macros By Chris Scott

The included macros are::

- DIRSORT.WPM: A menu of mode and sort options that works only in File Manager (see figure below). You can make it into an Alt-letter macro or nest it in a keyboard layout (WPK file) or both.
- F5.WPM - Copy/retrieve this macro to a keyboard layout (WPK file) to redefine F5 to access DIRSORT.

The menu does not have all options given by File Manager, but options are easy to add. The menu is primitive/easy.

Important: DIRSORT.WPM works only in File Manager.

<p>MODE :</p> <p>1 Short name 2 Long name 3 long description 4 long type F5 File List Dialog C make this default directory</p>	<p>SORT BY:</p> <p>D Date E Extension N Name S Size A ascend/descend toggle</p>
<p>cancel = any other key</p>
